# Master Road Index Manistee County

## Introduction

**T**HIS road index is the authority on the proper road names and proper spelling, for the unincorporated areas of Manistee County. This index also includes roads and streets for incorporated areas in the county. Every effort has been made to list all roads, streets, lanes, courts, highways, etc. found in Manistee County. Both public and private roads are intended to be included.

Road sign, map, or other errors, corrections, updating and suggestions should be reported to the Manistee County Planning Department, 395 Third Street, Manistee, Michigan 49660.

## Use of the Index

**E**ACH road, street, etc. is listed once. Names are arranged alphabetically. Numbered streets, etc., are in order as they are spelled: First Street, Seventh Avenue, Twenty-Eighth Street. If a name is listed more than once, it is because there is more than one road with the same name. There is one exception:

Some roads have address compass designations such as north, south, east, west. Generally, the compass designation is not a part of the road name. The compass designation is used to indicate the direction of address numbers when that road runs on both sides of the county's address base line or meridian line.

For example, Moss Road runs on both sides of the address base line. Addresses north of the base line read 257 north. Addresses south of the base line may read 457 south. Thus there will be a 257 north Moss Road and a 457 south Moss Road. In the index the road will be listed as: ``Moss Road, s;" immediately followed by ``Moss Road, n;". The user should also be aware that some roads in the county contain a compass direction as part of its proper name; such as South Shore Drive and East Moss Road.

The index also includes cross reference entries of former road names, common misspellings, aliases, and so on. In such instances, the entry will be followed by a notation ``see" with the proper name given. One must look up the proper name to find the location of the road. For example: ``Listen Road; see Litzen Road." or ``Professional Drive; see Fox Farm Road, west." The proper road entry will usually include a notation of any former names, misnomers, aliases or misspellings.

Each proper name entry is followed with the following information:

1. The name of the municipality(s) and section number(s) where the road is found [in brackets];
2. the range of address numbers which should be used/found along the road (in parentheses);
3. other notations on its location, such as a subdivision name or listing of aliases or misspellings, etc.

---

An example of an entry follows:

---

Tannerville Road; [Bear Lake Twp. Sec. 25,26,27; Maple Grove Twp. Sec. 30] (09000-12500).

Road's proper name; [Municipality(s) and section number(s) of location]  
(addresses) other notes.

---

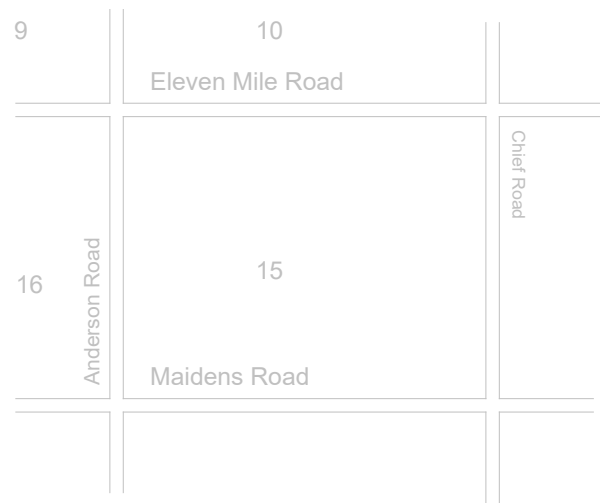

For compass address designations, entries will appear as follows:

---

Huff Road, n; [W. Norman Twp. Sec. 6] (00000-01000).

Huff Road, s; [W. Norman Twp. Sec. 7; E. Stronach Twp. Sec. 12] (00000-00500)

---

Each entry will list each section number the road is found in. Many roads follow section lines -- between sections. In such cases the following rules apply. When a road is on a section line, the section given in the listing will be the section to the west or north of the road/section line. Stated another way, given a section number, roads on the south or east line of the section are considered to be in that section. Roads on the west line are a part of the next section to the west. Roads on the north line are considered to be part of the next section to the north. (The exception will be the northernmost sections in the county, where the north section line is the Manistee-Benzie County line.) A drawing, on this page, shows where Anderson Road is in Section 16, Eleven Mile Road is in Section 10, Chief and Maidens Roads are in section 15.

## Abbreviations

**T**HE following abbreviations are used in the index:

**a.k.a.** means the road is also known as....

**City** means the City of Manistee.

**Co. Rt.** means county road route number.

**E.** means east, as in east Norman, Dickson, Stronach, Filer Townships.

**N.** means north, as in north Manistee Township.

**S.** means south, as in south Manistee Township.

**Sec.** means land description section number(s).

**Sub.** means a subdivision as recorded with a drawn plat.

**Twp.** means township.

**V.** means an incorporated village.

**W.** means west, as in west Norman, Dickson, Stronach, Filer, Manistee Townships.

## County address system

**T**HE Manistee County house numbering system was originally set up by Consumers Power Company. Consumers Power applied the address system to most areas of the county they service. In March 1985, the Manistee County Board of Commissioners adopted an Address Ordinance, which in effect extends the numbering system to the remainder of Manistee County, and requires the use of address numbers.

Manistee City uses an independent address numbering system, not the county system. Also, in parts of Oak Hill and Parkdale, the address numbering was “grandfathered” in and does not follow the concepts and rules given below.

The address number system is set up as a grid. The base line is a line which is along, and an extension of, Pine Creek Road, and Cedar Creek Road where that road follows a section line. In both directions from this line (north or south), address numbers increase 1000 for each mile. The meridian line is a line which is along, and an extension of, U.S. 31 South, Nelson Street, Hill Road, where those roads follow a section line. In both directions from this line (east or west), address numbers increase 1000 for each mile. The base and meridian line intersect in Manistee Lake.

Roads named as mile roads in Manistee County reflect the address system. Eight Mile Road, for example, is at north address 8000. Roughly, there is one address number available for both sides of a road every 10.56 feet. Thus a building on a 100-foot wide lot will have about 9 possible addresses. This allows for duplexes, apartments and landlocked property.

Even numbers are on the west and north sides of roads.

Odd numbers are on the south and east sides of roads.

Angling roads are numbered according to the direction of the major portion of the road. For example, Chippewa Highway, even though it runs northwest, is numbered as a north-south road, because south to north is its greatest extent of travel.

Address numbers can be used as a measure of distance. If an address is written with three digits to the right of a decimal point (or divide the address by 1000), the resulting number expresses the number of miles from the base or meridian line. For example, the Manistee County Tri-Ag. Building address is 6433; thus 6.433 miles east of the meridian line.

Addresses near base or meridian lines -- on roads which run on both sides of the base or meridian line -- will also include a north, south, east or west designation. The designation is to indicate which side of the base or meridian line the address is on. For example, one's address number may read “1567 north”, followed by the road name.
